

A BRIEF INTRODUCTION TO CHANGES IN R5.1

THE HEADLINES

Still in place

- R5 reports
- R5 metrics

Key changes

- Item as the unit of reporting
- Access Type definitions
- Expanded Data Types
- Upgraded SUSHI
- Revised JSON

Minor updates

- Registry links in report headers
- Global Item Reports for OA
- Components become optional

ITEM REPORTING

- ✓ Like-for-like comparison of usage across different types of content, including in the Item Report
- ✓ Main impact on Item metrics for books and reference works, but the Unique Title metrics are unaffected

SUSHI AND JSON

- Dropping IP authentication
- Updated endpoints
- New parameters

SUSHI

- OpenAPI3.1
- Compact: deduplicated and simplified
- Matched to tabular reports

JSON

DATA TYPES, SECTION TYPES AND COMPONENTS

- ✓ Longer list of Data Types to reflect diversity of content
- ✓ Clarified how to use Parent Data Types with Data Types in the Item Report
- ✓ Section Types are defunct because of the move to Item as the unit of reporting
- ✓ Components are now optional within the Item Report

Access Types changes are in *A Brief Introduction to COUNTER Attributes, etc.*
